

Ariel Focused Value

Quarter Ended December 31, 2023

Markets worldwide defied expectations in 2023 led by the dominating performance of mega-cap technology stocks known as the “magnificent seven.”¹ Even though gains have been concentrated, improving inflation data and dovish comments from the Federal Reserve drove a fourth quarter rally and strong finish to the year. Investor sentiment has shifted from fears of a recession towards optimism for a soft landing. Such turns in market psychology and economic forecasts continue to highlight the challenges of market timing and the importance of taking a long-term view. Although uncertainty and volatility are likely to remain elevated, the patient investor knows “stock prices trade on fundamentals. And when those solid fundamentals shine through, share prices rise.”² Against this backdrop, The Ariel Focused Value Composite increased +10.91% gross of fees (+10.73% net of fees) in the quarter, ahead of the +9.50% return posted by Russell 1000 Value Index but short of the +11.69% gain posted by the S&P 500 Index. Over the trailing one-year period, Ariel Focused Value Composite advanced +7.72% gross of fees (+7.03% net of fees), underperforming both the Russell 1000 Value and S&P 500 indices, which returned +11.46% and +26.29%, respectively.

Several stocks in the portfolio had strong returns in the quarter. Manufacturer and distributor of medical devices specializing in spine and dental products, **ZimVie, Inc. (ZIMV)**, advanced following a top- and bottom-line earnings beat and subsequent increase in full year guidance. Also in the quarter, ZIMV announced an agreement to sell its Spine business to an alternative investment firm, further aiding shares. Management believes the deal will be accretive to ZIMV’s revenue growth, EBITDA margin and cash flow conversion, enabling it to streamline operations and use the sale proceeds to pay down debt. We believe the divestiture allows ZIMV to reshape its portfolio as a pure-play dental company in higher-growth end markets with the best long-term growth potential.

Global investment bank, **Goldman Sachs Group, Inc. (GS)**, also increased on solid earnings results. The top-line came in strong led by elevated financing activity and an improvement in advisory revenues, despite weak transaction volumes within the investment banking segment. Should conditions remain conducive, management remains cautiously optimistic the business will experience continued recovery in both capital markets and strategy activity. Meanwhile, GS continues to successfully execute on its strategic initiatives to improve the overall return of the company. It is right sizing headcount and narrowing its ambitions in consumer strategy through divestitures and an enhanced focus on driving profitability in Platform Solutions by 2025. With potential regulatory capital constraints from B3E, GS noted it will reign in buybacks over the short-term but maintain its dividend. Looking ahead, we continue to view the near and long-term outlook for Goldman as attractive at current levels, given favorable business trends, continued positive momentum on strategic initiatives and active expense/capital management programs.

Additionally, gold mining company, **Barrick Gold Corporation (GOLD)** also traded up in the quarter. Despite operational challenges due to faulty equipment at Pueblo Viejo, the company delivered a bottom-line beat driven by improved production levels at lower costs across several other mines. Meanwhile, GOLD continues to upgrade mining operations to improve efficiencies and reiterated guidance for a 30% increase in gold-equivalent ounces by the end of this decade.

Alternatively, several positions weighed on performance. Oil and natural gas explorer, **APA Corporation (APA)**, declined in the quarter. Although the company delivered healthy earnings results, the operational momentum was overshadowed by a softer than expected 2024 outlook for oil production. Investors were also disappointed with the flat capital expenditure guide for 2024, as management decided to reallocate savings from the North Sea to the Permian Basin. Meanwhile, APA continues to express confidence in the

¹ The “Magnificent Seven” are the largest stocks in the S&P 500 Index driving market performance: Apple Inc. (AAPL), Amazon.com, Inc. (AMZN), Alphabet Inc. (GOOGL), Meta Platforms Inc. (META), Microsoft Corp. (MSFT), NVIDIA Corp. (NVDA) and Tesla, Inc. (TSLA).

² Hobson, Melody and John W. Rogers Jr. “What the Stock market Taught Us This Year: Don’t Fall for These Investing Traps.” *Wall Street Journal*, 5 December 2023. <https://www.wsj.com/finance/investing/stock-market-2023-lessons-investing-2cedd44f>

Suriname development and is working with TotalEnergies to complete a plan for the oil hub. Looking ahead, APA is focused on higher-margin oil developments, driving safety and operational improvements, and prioritizing a reduction in carbon intensity. At current valuation levels, APA is trading at a discount to our private market value estimate.

Leading supplier of solutions for combustion, hybrid and electric vehicles **BorgWarner, Inc. (BWA)**, also traded lower. Softer than expected earnings results and a reduction to both near and mid-term guidance driven by recent launch delays for new electric vehicles and slower sales momentum by several original equipment manufacturers weighed on shares. Nonetheless, management still expects electric vehicle sales of over \$10 billion annually by 2027. Despite slower than anticipated EV adoption, we believe BWA remains well positioned near-term to benefit from its low-emission, combustion and hybrid vehicle product offerings and expect the company will grow intrinsic value throughout the evolution in the hybrid and EV market.

Lastly, shares of global leader in money transfer services, **Western Union Company (WU)**, declined in the period, despite the delivery of solid earnings and a subsequent raise in full year guidance. These results were aided by regulatory change in Iraq and margin expansion in the retail business. Meanwhile, management continues to make progress executing on its Evolve 2025 Strategy and continues to return capital to shareholders through dividends and share repurchases. Although the company anticipates the macroeconomic environment will continue to slow, it reminded investors remittances have proved resilient in prior periods of economic contraction. At current levels, WU is trading at a discount to our estimate of private market value.

We did not initiate any new positions in the quarter, however we did exit consumer health company, **Kenvue, Inc. (KVUE)**, to deploy cash into more compelling opportunities.

As the pendulum of worry swings from one scenario to another, our focus on recent headlines and macroeconomic developments is to consider their effect on the long-term intrinsic worth of our holdings over the next five-to-ten years. As rates begin to subside in 2024 and beyond, we believe the gap between mega-cap stocks and their small to mid-cap counterparts will begin to narrow, fortified by consumer confidence, wages that are not likely to go down, as well as slowing, yet steady long-term economic growth. Despite the continued concentration of the U.S. equity market, our 41 years of patient investing spanning five market cycles—the crash of 1987, the dot-com era, the global financial crisis, the U.S. debt downgrade and the Covid plunge—have taught us the fundamental principles of investing are resilient. We believe the disciplined investor that stays the course and consistently owns differentiated, quality business models with robust balance sheets will outperform in the long run.

Investing in equity stocks is risky and subject to market volatility. A focused portfolio may be subject to greater volatility than a diversified portfolio. The intrinsic value of the stocks in which the portfolio invests may never be recognized by the broader market. The portfolio is often concentrated in fewer sectors than its benchmarks, and its performance may suffer if these sectors underperform the overall stock market.

Past performance does not guarantee future results. Performance results are shown net of the highest management fee charged to any client in the Composite during the performance period. Net returns reflect performance returns after the deduction of advisory fees and transaction costs and assume the reinvestment of dividends and other earnings. For the period ended 12/31/23, the performance (net of fees) for the Ariel Focused Value Composite for the 1-, 5-, and 10-year periods was +7.03%, +9.64%, and +6.15%, respectively. For the period ended 12/31/23 the performance for the Russell 1000 Value Index and the S&P 500 Index for the 1-, 5-, and 10-year periods was +11.46%, +10.91%, and +8.40%, and +26.29%, +15.69%, and +12.03%, respectively. Actual fees may vary depending on, among other things, the applicable fee schedule and portfolio size. A complete fee schedule is available upon request and may also be found in Ariel Investments LLC's Form ADV, Part 2. Returns are expressed in U.S. dollars. Current performance may be lower or higher than the performance data quoted. The Ariel Focused Value Composite differs from its benchmark with dramatically fewer holdings concentrated in fewer sectors.

The opinions are current as of the date of this commentary but are subject to change. The information provided in this commentary does not provide information reasonably sufficient upon which to base an investment decision and should not be considered a recommendation to purchase or sell any particular security. There is no guarantee that any of the views expressed will come to fruition or any investment will perform as described.

As of 12/31/23, ZimVie, Inc. constituted 2.5% of the Ariel Focused Value Composite (representative portfolio); Goldman Sachs Group, Inc. 6.4%; Barrick Gold Corporation 3.4%; APA Corporation 5.2%; BorgWarner, Inc. 3.2%; Western Union Company 3.3%; and Kenvue, Inc. 0.0%. Portfolio holdings are subject to change. The performance of any single portfolio holding is no indication of the performance of other portfolio holdings of the Ariel Focused Value Composite.
