Investing in equity stocks is risky and subject to the volatility of the markets. The performance of any single portfolio holding is no indication of the performance of other portfolio holdings or its strategy. Investing in small- and mid-cap stocks is more risky and volatile than investing in large-cap stocks. Investments in non-U.S. securities may underperform and may be more volatile than comparable U.S. stocks because of the risks involving non-U.S. economies, markets, political systems, regulatory standards, currencies, and taxes. The intrinsic value of the stocks in which the Funds invest may never be recognized by the broader market. The Funds are often concentrated in fewer sectors than their benchmarks, and their performance may suffer if these sectors underperform the overall stock market. Investments in emerging and developing markets present additional risks, such as difficulties in selling on a timely basis and at an acceptable price. The information shown does not provide information reasonably sufficient upon which to base an investment decision and should not be considered a recommendation to purchase or sell any particular security. **Past performance does not guarantee future results.**

Investors should consider carefully the investment objectives, risks, and charges and expenses before investing.
