State Street Institutional U.S. Government Money Market Fund
Class G (SSOXX)
Administration Class (SALXX)

(The "Fund")
Supplement dated October 3, 2023 to the
Summary Prospectuses, Prospectuses and Statement of Additional Information (the "SAI"), each dated
April 30, 2023, as may be supplemented and/or revised from time to time

Effective immediately, the Summary Prospectuses and the Prospectuses are revised as follows:

- The first paragraph of the sub-section titled "Principal Risks" within the Fund Summary section is hereby deleted and replaced with the following:

  The Fund is subject to the following risks. You could lose money by investing in the Fund. Although the Fund seeks to preserve the value of your investment at $1.00 per share, it cannot guarantee it will do so. **An investment in the Fund is subject to investment risks, including possible loss of principal, is not a deposit in a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation ("FDIC") or any other government agency**. The Fund's sponsor is not required to reimburse the Fund for losses, and you should not expect that the sponsor will provide financial support to the Fund at any time, including during periods of market stress.

Effective immediately, the Prospectuses are revised as follows:

- In the section titled "Additional Information About Investment Objectives, Principal Strategies and Risks – Additional Information About Risks," the paragraph titled "Money Market Fund Regulatory Risk" is here by deleted and replaced with the following:

  Money Market Fund Regulatory Risk. Money market funds and the securities they invest in are subject to comprehensive regulations. The SEC has adopted amendments to money market fund regulation that, among other things, increase the daily and weekly liquid asset requirements ("Money Market Fund Reform"). Money Market Reform permits government money market funds (such as the Fund), that are experiencing a negative gross yield as a result of negative interest rates, to either convert from a stable share price to a floating share price or reduce the number of shares outstanding (e.g., through a reverse stock split) to maintain a stable net asset value per share, subject to certain Board determinations and disclosures to investors. The Fund's operations will be impacted as it comes into compliance with the New Money Market Fund Rules. The SEC and other government agencies continue to review the regulation of money market funds and may implement additional regulatory changes in the future. The enactment of any new legislation or regulations impacting the money market fund industry could limit the Fund's investment flexibility and reduce its ability to generate returns.

- In the section titled "Additional Information About Investment Objectives, Principal Strategies and Risks – Additional Information About Risks," the paragraph titled "Money Market Risk" is hereby deleted and replaced with the following:

Money Market Risk. An investment in a money market fund is not a deposit of any bank and is not insured or guaranteed by the FDIC or any other government agency. Although a money market fund generally seeks to preserve the value of its shares at $1.00 per share, there can be no assurance that it will do so, and it is possible to lose money by investing in a money market fund. A major or unexpected change in interest rates or a decline in the credit quality of an issuer or entity providing credit support, an inactive trading market for money market instruments, or adverse market, economic, industry, political, regulatory, geopolitical, and other conditions could cause a money market fund's share price to fall below $1.00. It is possible that a money market fund will issue and redeem shares at $1.00 per share at times when the fair value of the money market fund's portfolio per share is more or less than $1.00. A money market fund may be permitted to impose redemption fees during periods of high illiquidity in the markets for the investments held by it. None of State Street Corporation, State Street, State Street Global Advisors, SSGA FM or their affiliates (collectively, the "State Street Entities") guarantee the value of an investment in a money market fund at $1.00 per share. Investors should have no expectation of capital support to a money market fund from the State Street Entities.

Effective immediately, the SAI is revised as follows:

- The following is added as a new sub-section to the section titled "Additional Investments and Risks":

  <u>Recent Money Market Regulatory Reforms.</u>

  On July 12, 2023, the SEC adopted amendments to money market fund regulation ("Money Market Fund Reform") that, beginning on April 2, 2024, increase the daily liquid asset requirements from 10% to 25% and increase the weekly liquid asset requirements from 30% to 50%. Money Market Fund Reform permits government money market funds (such as the Fund), that are experiencing a gross negative yield as a result of negative interest rates, to either convert from a stable share price to a floating share price or reduce the number of shares outstanding (through a reverse stock split) to maintain a stable net asset value per share, subject to certain Board determinations and disclosures to investors. Money Market Fund Reform, among other things, also imposes additional reporting requirements on money market funds. The Fund's operations will be impacted as it comes into compliance with Money Market Fund Reform.

Supplement dated October 3, 2023 to the
Summary Prospectuses, Prospectus and Statement of Additional Information (the "SAI"), each dated
April 30, 2023, as may be supplemented and/or revised from time to time

Effective immediately, the Summary Prospectuses and the Prospectus are revised as follows:

- The first paragraph of the sub-section titled "Principal Risks" within the Fund Summaries section for the State Street Institutional Liquid Reserves Fund is hereby deleted and replaced with the following:

  You could lose money by investing in the Fund. Because the share price of the Fund will fluctuate, when you sell your shares, they may be worth more or less than what you originally paid for them. The Fund may impose a fee upon the sale of your shares. Under Money Market Fund Reform, as discussed further below, in the future the Fund generally will be required to impose a fee upon the sale of your shares when net sales of Fund shares exceed certain levels and in other cases the Fund will have the discretion to charge a fee upon the sale of your shares. This discretionary and mandatory liquidity fee framework is not currently in place. **An investment in the Fund is subject to investment risks, including possible loss of principal, is not a deposit in a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation ("FDIC") or any other government agency.** The sponsor is not required to reimburse the Fund for losses, and you should not expect that the sponsor will provide financial support to the Fund at any time, including during periods of market stress.

- The first paragraph of the sub-section titled "Principal Risks" within the Fund Summaries sections for the State Street Institutional Treasury Money Market Fund, State Street Institutional Treasury Plus Money Market Fund, and State Street Institutional U.S. Government Money Market Fund, is hereby deleted and replaced with the following:

  The Fund is subject to the following risks. You could lose money by investing in the Fund. Although the Fund seeks to preserve the value of your investment at $1.00 per share, it cannot guarantee it will do so. **An investment in the Fund is subject to investment risks, including possible loss of principal, is not a deposit in a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation ("FDIC") or any other government agency.** The Fund's sponsor is not required to reimburse the Fund for losses, and you should not expect that the sponsor will provide financial support to the Fund at any time, including during periods of market stress.

Effective immediately, the Prospectus is revised as follows:

- In the section titled "Additional Information About Investment Objectives, Principal Strategies and Risks – Additional Information About Risks," the paragraph titled "Money Market Fund Regulatory Risk" is here by deleted and replaced with the following:

  Money Market Fund Regulatory Risk. Money market funds and the securities they invest in are subject to comprehensive regulations. The SEC has adopted amendments to money market fund regulation that, among other things, increase the daily and weekly liquid asset requirements ("Money Market Fund Reform"). Effective no later than April 2, 2024, Money Market Fund Reform permits the Money Market Portfolio to impose liquidity fees under certain circumstances and, effective no later than October 2, 2024, Money Market Fund Reform will require the Money Market Portfolio to impose liquidity fees under certain circumstances. The ILR Fund is required to pass along to its investors any liquidity fee charged by the Money Market Portfolio on the same terms as imposed by the Money Market Portfolio. In addition, Money Market Reform permits government money market funds (such as the U.S. Government Fund, Treasury Fund and Treasury Plus Fund), that are experiencing a negative gross yield as a result of negative interest rates, to either convert from a stable share price to a floating share price or reduce the number of shares outstanding (e.g., through a reverse stock split) to maintain a stable net asset value per share, subject to certain Board determinations and disclosures to investors. A Fund's operations will be impacted as it comes into compliance with the New Money Market Fund Rules. The SEC and other government agencies continue to review the regulation of money market funds and may implement additional regulatory changes in the future. The enactment of any new legislation or regulations impacting the money market fund industry could limit the Fund's investment flexibility and reduce its ability to generate returns.

- In the section titled "Additional Information About Investment Objectives, Principal Strategies and Risks – Additional Information About Risks," the paragraph titled "Money Market Risk (principal risk for the U.S. Government Fund, Treasury Fund and Treasury Plus Fund)" is hereby deleted and replaced with the following:

  Money Market Risk (principal risk for the U.S. Government Fund, Treasury Fund and Treasury Plus Fund). An investment in a money market fund is not a deposit of any bank and is not insured or guaranteed by the FDIC or any other government agency. Although a money market fund generally seeks to preserve the value of its shares at $1.00 per share, there can be no assurance that it will do so, and it is possible to lose money by investing in a money market fund. A major or unexpected change in interest rates or a decline in the credit quality of an issuer or entity providing credit support, an inactive trading market for money market instruments, or adverse market, economic, industry, political, regulatory, geopolitical, and other conditions could cause a money market fund's share price to fall below $1.00. It is possible that a money market fund will issue and redeem shares at $1.00 per share at times when the fair value of the money market fund's portfolio per share is more or less than $1.00. A money market fund may be permitted to impose redemption fees during periods of high illiquidity in the markets for the investments held by it. None of State Street Corporation, State Street, State Street Global Advisors, SSGA FM or their affiliates (collectively, the "State Street Entities") guarantee the value of an investment in a money market fund at $1.00 per share. Investors should have no expectation of capital support to a money market fund from the State Street Entities.

- The sub-section titled "Certain special limitations affecting redemptions" in the section titled "Shareholder Information – Redeeming Shares – ILR Fund" is here by deleted and replaced with the following:

  Certain special limitations affecting redemptions. The SEC has recently adopted a number of requirements, including mandatory and discretionary liquidity fees for money market funds. The Fund will pass through to its investors any liquidity fee imposed by the Portfolio on the same terms and conditions as imposed by the Portfolio on the Fund.

  Effective no later than April 2, 2024, the Portfolio may impose a liquidity fee (not to exceed 2%) if the Portfolio's Board, including a majority of the Portfolio's Independent Trustees, determines that the liquidity fee is in the best interests of the Portfolio. The liquidity fee will remain in effect until the Portfolio Board, including a majority of the Independent Directors, determines that imposing such liquidity fee is no longer in the best interests of the Fund. Effective no later than October 2, 2024, the Portfolio will be required to impose liquidity fees under certain circumstances. All liquidity fees payable by the Fund would be passed through to its shareholders, would be payable to its Portfolio and could offset any losses realized by the Portfolio when seeking to honor redemption requests. If liquidity fees are imposed by the Portfolio, the Fund will notify shareholders on the Fund's website. The Fund expects to treat such liquidity fees paid to its corresponding Portfolio as reducing proceeds paid to shareholders in redemption of Fund shares, and not constituting income to the Portfolio or the Fund.

Effective immediately, the SAI is revised as follows:

- The following is added as a new sub-section to the section titled "Additional Investments and Risks":

  <u>Recent Money Market Regulatory Reforms.</u>

  On July 12, 2023, the SEC adopted amendments to money market fund regulation ("Money Market Fund Reform") that, beginning on April 2, 2024, increase the daily liquid asset requirements from 10% to 25% and increase the weekly liquid asset requirements from 30% to 50%. Effective no later than October 2, 2024, Money Market Fund Reform will require the Money Market Portfolio to impose liquidity fees under certain circumstances. The ILR Fund is required to pass along to its investors any liquidity fee charged by the Money Market Portfolio on the same terms as imposed by the Money Market Portfolio. In addition, Money Market Fund Reform permits government money market funds (such as the U.S. Government Fund, Treasury Fund and Treasury Plus Fund), that are experiencing a gross negative yield as a result of negative interest rates, to either convert from a stable share price to a floating share price or reduce the number of shares outstanding (through a reverse stock split) to maintain a stable net asset value per share, subject to certain Board determinations and disclosures to investors. Money Market Fund Reform, among other things, also imposes additional reporting requirements on money market funds. A Fund's operations will be impacted as it comes into compliance with Money Market Fund Reform.

Summary Prospectus – April 30, 2023

Before you invest, you may want to review the fund's prospectus, which contains more information about the fund and its risks. You may find the fund's prospectus and other information about the fund online at:

http://www.ssga.com/cash

You may also get this information at no cost by calling (866) 392-0869, by sending an e-mail request to Fund_Inquiry@ssga.com, or by writing to the fund, c/o State Street Global Advisors Funds Distributors, LLC, One Iron Street, Boston, Massachusetts 02210. The fund's current prospectus and statement of additional information are incorporated by reference into this summary prospectus.

Investment Objective

The investment objective of the State Street Institutional U.S. Government Money Market Fund (the "U.S. Government Fund" or sometimes referred to in context as the "Fund") is to seek to maximize current income, to the extent consistent with the preservation of capital and liquidity and the maintenance of a stable $1.00 per share net asset value ("NAV").

Fees and Expenses of the Fund

The tables below describe the fees and expenses that you may pay if you buy, hold, and sell shares of the U.S. Government Fund ("Fund Shares"). **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the tables and examples below.** The expenses shown in the table and the Example reflect the expenses of the Fund and the Fund's proportionate share of the expenses of the State Street U.S. Government Money Market Portfolio (the "U.S. Government Portfolio" or sometimes referred to in context as the "Portfolio").

Shareholder Fees (fees paid directly from your investment)

	Institutional	Administration	Investment	Investor	Premier	Opportunity
Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price)	None	None	None	None	None	None
Maximum Deferred Sales Charge (Load) (as a percentage of the lower of the sale proceeds or the original offering price)	None	None	None	None	None	None

STATE STREET GLOBAL ADVISORS

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

	Institutional	Administration	Investment	Investor	Premier	Opportunity
Management Fee	0.05%	0.05%	0.05%	0.05%	0.05%	0.05%
Distribution and/or Shareholder Service (12b-1) Fees	0.00%	0.05%	0.10%	0.00%	0.00%	0.00%
Other Expenses	0.10%	0.27%	0.32%	0.15%	0.07%	0.10%
Total Annual Fund Operating Expenses[1]	0.15%	0.37%	0.47%	0.20%	0.12%	0.15%

1 The Fund's investment adviser, SSGA Funds Management, Inc. (the "Adviser" or "SSGA FM"), and its affiliates, may voluntarily reduce all or a portion of their fees and/or reimburse expenses of the Fund or a share class to the extent necessary to maintain a certain minimum net yield, which may vary from time to time and from share class to share class within the Fund, in SSGA FM's sole discretion (any such waiver or reimbursement of expenses being referred to herein as a "Voluntary Reduction"), or a yield below a specified level, which may vary from time to time in the Adviser's sole discretion. The Fund has agreed, subject to certain limitations, to reimburse the Adviser and its affiliates for the full dollar amount of any Voluntary Reduction incurred beginning on May 1, 2020. During the fiscal year ended December 31, 2022, the Adviser and its affiliates waived fees and/or reimbursed expenses under the Voluntary Reduction. Each of the Adviser and its affiliates may, in its sole discretion, irrevocably waive receipt of any or all reimbursement amounts due from the Fund. Any future reimbursement by the Fund of the Voluntary Reduction would increase the Fund's expenses and may reduce the Fund's yield during such period. There is no guarantee that the Voluntary Reduction will be in effect at any given time or that the Fund will be able to avoid a negative yield.

Example:

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest $10,000 in the Fund for the time periods indicated, and then sell or hold all of your Fund Shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 year	3 years	5 years	10 years
Institutional	$15	$ 48	$ 85	$192
Administration	$38	$119	$208	$468
Investment	$48	$151	$263	$591
Investor	$20	$ 64	$113	$255
Premier	$12	$ 39	$ 68	$154
Opportunity	$15	$ 48	$ 85	$192

Principal Investment Strategies

The U.S. Government Fund is a government money market fund and invests only in obligations issued or guaranteed as to principal and/or interest, as applicable, by the U.S. government or its agencies and instrumentalities, as well as repurchase agreements secured by such instruments. The Fund may hold a portion of its assets in cash pending investment, to satisfy redemption requests or to meet the Fund's other cash management needs.

The Fund follows a disciplined investment process that attempts to provide stability of principal, liquidity and current income, by investing in U.S. government securities. Among other things, SSGA Funds Management, Inc. ("SSGA FM" or the "Adviser"), the investment adviser to the Fund, conducts its own credit analyses of potential investments and portfolio holdings, and relies substantially on a dedicated short-term credit research team. The Fund invests in accordance with regulatory requirements applicable to money market funds. Regulations require, among other things, a money market fund to invest only in short-term, high quality debt obligations (generally, securities that have remaining maturities of 397 calendar days or less, with the exception of certain floating rate securities that may have final maturities longer than 397 days but use maturity shortening provisions to meet the 397 day requirement, and that the Fund believes present minimal credit risk), to maintain a maximum dollar-weighted average maturity and dollar-weighted average life of sixty (60) days or less and 120 days or less, respectively, and to meet requirements as to portfolio diversification and liquidity. All securities held by the Fund are U.S. dollar-denominated, and they may have fixed, variable or floating interest rates.

The Fund attempts to meet its investment objective by investing in:

- Obligations issued or guaranteed as to principal and/or interest, as applicable, by the U.S. government or its agencies and instrumentalities, such as U.S. Treasury securities and securities issued by the Government National Mortgage Association ("GNMA"), which are backed by the full faith and credit of the United States;
- Obligations issued or guaranteed by the Federal Home Loan Mortgage Corporation, the Federal National Mortgage Association, and U.S. government-sponsored entities such as the Federal Home Loan Bank, and the Federal Farm Credit Banks Funding Corporation, which are not backed by the full faith and credit of the United States; and
- Repurchase agreements collateralized by U.S. government securities.

The Fund seeks to achieve its investment objective by investing substantially all of its investable assets in the U.S. Government Portfolio, which has substantially identical investment policies to the Fund. When the Fund invests in this "master-feeder" structure, the Fund's only investments are shares of the Portfolio, and it participates in the investment returns achieved by the Portfolio. Descriptions in this section of the investment activities of the "Fund" also generally describe the expected investment activities of the Portfolio.

Principal Risks

The Fund is subject to the following risks. You could lose money by investing in the Fund. Although the Fund seeks to preserve the value of your investment at $1.00 per share, it cannot guarantee it will do so. **An investment in the Fund is subject to investment risks, including possible loss of principal, is not a deposit in a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation ("FDIC") or any other government agency.** The Fund's sponsor has no legal obligation to provide financial support to the Fund, and you should not expect that the sponsor will provide financial support to the Fund at any time. Certain risks relating to instruments and strategies used in the management of the Fund are placed first. The significance of any specific risk to an investment in the Fund will vary over time, depending on the composition of the Fund's portfolio, market conditions, and other factors. You should read all of the risk information presented below carefully, because any one or more of these risks may result in losses to the Fund.

Money Market Risk: An investment in a money market fund is not a deposit of any bank and is not insured or guaranteed by the FDIC or any other government agency. Although a money market fund generally seeks to preserve the value of its shares at $1.00 per share, there can be no assurance that it will do so, and it is possible to lose money by investing in a money market fund. A major or unexpected change in interest rates or a decline in the credit quality of an issuer or entity providing credit support, an inactive trading market for money market instruments, or adverse market, economic, industry, political, regulatory, geopolitical, and other conditions could cause a money market fund's share price to fall below $1.00.

U.S. Government Securities Risk: Certain U.S. government securities are supported by the full faith and credit of the United States; others are supported by the right of the issuer to borrow from the U.S. Treasury; others are supported by the discretionary authority of the U.S. government to purchase the agency's obligations; and still others are supported only by the credit of the issuing agency, instrumentality, or enterprise. Although U.S. government-sponsored enterprises such as the Federal Home Loan Mortgage Corporation ("Freddie Mac") and the Federal National Mortgage Association ("Fannie Mae") may be chartered or sponsored by Congress, they are not funded by Congressional appropriations, and their securities are not issued by the U.S. Treasury, are not supported by the full faith and credit of the U.S. government, and involve increased credit risks.

Repurchase Agreement Risk: Repurchase agreements may be viewed as loans made by the Fund which are collateralized by the securities subject to repurchase. If the Fund's counterparty should default on its obligations and the Fund is delayed or prevented from recovering the collateral, or if the value of the collateral is insufficient, the Fund may realize a loss.

Stable Share Price Risk: If the market value of one or more of the Fund's investments changes substantially, the Fund may not be able to maintain a stable share price of $1.00. This risk typically is higher during periods of rapidly changing interest rates or when issuer credit quality generally is falling, and is made worse when the Fund experiences significant redemption requests.

Market Risk: The Fund's investments are subject to changes in general economic conditions, general market fluctuations and the risks inherent in investment in securities markets. Investment markets can be volatile and prices of investments can change substantially due to various factors including, but not limited to, economic growth or recession, changes in interest rates, inflation, changes in the actual or perceived creditworthiness of issuers, and general market liquidity. The Fund is subject to the risk that geopolitical events will disrupt securities markets and adversely affect global economies and markets. Local, regional or global events such as war, military conflicts, acts of terrorism, natural disasters, the spread of infectious illness or other public health issues, or other events could have a significant impact on the Fund and its investments.

Low Short-Term Interest Rates: During market conditions in which short-term interest rates are at low levels, the Fund's yield can be very low. During these conditions, it is possible that the Fund will generate an insufficient amount of income to pay its expenses, and that it will not be able to pay a daily dividend and may have a negative yield (i.e., it may lose money on an operating basis). It is possible that the Fund would, during these conditions, maintain a substantial portion of its assets in cash, on which it may earn little, if any, income.

Counterparty Risk: The Fund will be subject to credit risk with respect to the counterparties with which the Fund enters into repurchase agreements and other transactions. If a counterparty fails to meet its contractual obligations, the Fund may be unable to terminate the transaction, and it may be delayed or prevented from realizing on any collateral in the event of a bankruptcy or insolvency proceeding relating to the counterparty.

Debt Securities Risk: The values of debt securities may increase or decrease as a result of the following: market fluctuations, changes in interest rates, actual or perceived inability or unwillingness of issuers, guarantors or liquidity providers to make scheduled principal or interest payments, or illiquidity in debt securities markets. To the extent that interest rates rise, certain underlying obligations may be paid off substantially slower than originally anticipated and the value of those securities may fall sharply. A rising interest rate environment may cause the value of the Fund's fixed income securities to decrease, an adverse impact on the liquidity of the Fund's fixed income securities, and increased volatility of the fixed income markets. During periods when interest rates are at low levels, the Fund's yield can be low, and the Fund may have a negative yield (i.e., it may lose money on an operating basis). To the extent that interest rates fall, certain underlying obligations may be paid off substantially faster than originally anticipated. If the principal on a debt obligation is prepaid before expected, the prepayments of principal may have to be reinvested in obligations paying interest at lower rates. During periods of falling interest rates, the income received by the Fund may decline. Changes in interest rates will likely have a greater effect on the values of debt securities of longer durations. Returns on investments in debt securities could trail the returns on other investment options, including investments in equity securities. The U.S. Federal Reserve has been engaged in an aggressive campaign to raise interest rates in an effort to combat historically high levels of inflation. Interest rate increases may continue. High levels of inflation and/or a significantly changing interest rate environment can lead to heightened levels of volatility and reduced liquidity.

Interest Rate Risk: Interest rate risk is the risk that debt securities will decline in value because of increases in interest rates. The value of a security with a longer duration will be more sensitive to changes in interest rates than a similar security with a shorter duration. Interest-only and principal-only securities are especially sensitive to interest rate changes, which can affect not only their prices but can also change the income flows and repayment assumptions about those investments.

Income Risk: The Fund's income may decline due to falling interest rates or other factors. Issuers of securities held by the Fund may call or redeem the securities during periods of falling interest rates, and the Fund would likely be required to reinvest in securities paying lower interest rates. If an obligation held by the Fund is prepaid, the Fund may have to reinvest the prepayment in other obligations paying income at lower rates.

Large Shareholder Risk: To the extent a large proportion of the interests of the Portfolio are held by a small number of investors (or a single investor), including funds or accounts over which the Adviser has investment discretion, the Portfolio is subject to the risk that these investors will purchase or redeem Portfolio interests in large amounts rapidly or unexpectedly, including as a result of an asset allocation decision made by the Adviser. These transactions could adversely affect the ability of the Portfolio to conduct its investment program.

Master/Feeder Structure Risk: The Fund pursues its objective by investing substantially all of its assets in another pooled investment vehicle (a "master fund"). The ability of the Fund to meet its investment objective is directly related to the ability of the master fund to meet its investment objective. The Adviser serves as investment adviser to the master fund, leading to potential conflicts of interest. The Fund will bear its pro rata portion of the expenses incurred by the master fund. Substantial redemptions by other investors in a master fund may affect the master fund's investment program adversely and limit the ability of the master fund to achieve its objective.

Mortgage-Related and Other Asset-Backed Securities Risk: Investments in mortgage-related and other asset-backed securities are subject to the risk of significant credit downgrades, illiquidity, and defaults to a greater extent than many other types of fixed-income investments. The liquidity of mortgage-related and asset-backed securities may change over time. During periods of falling interest rates, mortgage- and asset-backed securities may be called or prepaid, which may result in the Fund having to reinvest proceeds in other investments at a lower interest rate. During periods of rising interest rates, the average life of mortgage- and asset-backed securities may extend, which may lock in a below-market interest rate, increase the security's duration and interest rate sensitivity, and reduce the value of the security. Enforcing rights against the underlying assets or collateral may be difficult, and the underlying assets or collateral may be insufficient if the issuer defaults.

Rapid Changes in Interest Rates Risk: Rapid changes in interest rates may cause significant requests to redeem Fund Shares, and possibly cause the Fund to sell portfolio securities at a loss to satisfy those requests.

Significant Exposure to U.S. Government Agencies or Instrumentalities Risk: To the extent the Fund focuses its investments in securities issued or guaranteed by U.S. government agencies or instrumentalities, any market movements, regulatory changes or changes in political or economic conditions that affect the U.S. government agencies or instrumentalities in which the Fund invests may have a significant impact on the Fund's performance. Events that would adversely affect the market prices of securities issued or guaranteed by one government agency or instrumentality may adversely affect the market price of securities issued or guaranteed by other government agencies or instrumentalities.

U.S. Treasury Obligations Risk: U.S. Treasury obligations may differ from other fixed income securities in their interest rates, maturities, times of issuance and other characteristics. Similar to other issuers, changes to the financial condition or credit rating of the U.S. government may cause the value of the Fund's U.S. Treasury obligations to decline.

Variable and Floating Rate Securities Risk: During periods of increasing interest rates, changes in the coupon rates of variable or floating rate securities may lag behind the changes in market rates or may have limits on the maximum increases in coupon rates. Alternatively, during periods of declining interest rates, the coupon rates on such securities will typically readjust downward resulting in a lower yield.

Performance

The bar chart and table below provide some indication of the risks of investing in the U.S. Government Fund by illustrating the variability of the Fund's returns for Premier Class shares from year-to-year. The Fund's past performance does not necessarily indicate how the Fund will perform in the future. Current performance information for the Fund is available toll free by calling (877) 521-4083 or by visiting our website at www.ssga.com/cash.

You may purchase or redeem Fund Shares on any day the Fund is open for business.

You may purchase or redeem Fund Shares by written request or wire transfer. Written requests should be sent to:

By Mail:

State Street Funds
P.O. Box 219737
Kansas City, MO 64121-9737

By Overnight:

State Street Funds
430 W 7th Street Suite 219737
Kansas City, MO 64105-1407

By Telephone:

For wire transfer instructions, please call (866) 392-0869 between 7:00 a.m. and 5:00 p.m. Eastern time. Redemptions by telephone are permitted only if you previously have been authorized for these transactions.

By Intermediary:

If you wish to purchase or redeem Fund Shares through a broker, bank or other financial intermediary ("Financial Intermediary"), please contact that Financial Intermediary directly. Your Financial Intermediary may have different or additional requirements for opening an account and/or for the processing of purchase and redemption orders, or may be closed at times when the Fund is open.

Financial Intermediaries may contact SS&C GIDS, Inc. at (877) 332-6207 or via email at nsccresearch@dstsystems.com with questions.

Tax Information

For U.S. federal income tax purposes, the Fund's distributions are expected to be taxed as ordinary income unless you are investing through a tax-advantaged arrangement, such as a 401(k) plan or individual retirement account. Any withdrawals made from such tax-advantaged arrangement may be taxable to you.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase Fund Shares through a broker-dealer or other Financial Intermediary (such as a bank), the Adviser or its affiliates may pay the Financial Intermediary for certain activities related to the Fund, including educational training programs, conferences, the development of technology platforms and reporting systems, or other services related to the sale or promotion of the Fund. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your Financial Intermediary's website for more information.
